TRIFACTA

Letter of Recommendation
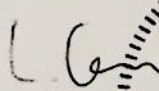

To Whom It May Concern:

I am very pleased to provide a reference for Mr. Danut Mihaita Rusu, born April 1, 1995, whose work I supervised during his internship at Trifacta Berlin from 01/Jun/2016 to 31/Aug/2016. During this time, he worked in the engineering department on integrating Trifacta into a cloud platform. His work comprised of developing software that accesses a cloud-based storage system and a cloud-based distributed execution platform. He used Java and JavaScript in his work.

His tasks were:

- Contributing to investigation of client-server performance characteristics including writing automated test scripts
- Contributing to single-sign-on integration into cloud platform using OAuth2
- Contributing to Cloud Storage support implementation, for which his work included: implementing & testing main access methods, refactoring tests, enabling cloud storage browsing in application
- Fixing of bugs from the bug backlog
- Implementing user-defined functions and data transformations for Dataflow

Mr. Rusu always showed an excellent knowledge of software development techniques. He was a pleasure to have in the group, consistently showing his enthusiasm, excellent work, ethic, and positive spirit. These characteristics, together with the responsibility in performing the tasks entrusted to him, will allow him to be integrated well in any company. I highly recommend Mr. Rusu to any institution that is fortunate enough to have him.

Sincerely,

Lars Grammel
Sr. Manager of Engineering, Trifacta Berlin
